X-Y PRODUCTION DUAL CALIPER

MAKING INTERVENTION
SMARTER

X-Y Production Dual Caliper (PDC). The X-Y caliper provides simultaneous measurements in the X and Y axis, resulting in an accurate assessment of the geometry of the tubular being logged.

FEATURES

- Determination of X-Y diameters in horizontal wells
- Correction of spinner derived fluid velocity for varying completion diameter
- Detection of serious deformation or corrosion
- Detection of scale build-up
- Depth correlation
- Combinable with other GE Ultrawire™ tools
